

Invitation to workshop

Transforming the Future

Transforming the future for the better in an increasingly complex world is not trivial. Many endeavors are successful, others fall short of expectations. There is a need to learn from each other and to develop our abilities to make a real and lasting difference.

The recently published book “Transforming the Future - Anticipation in the 21st Century” (available open access) is an important contribution to this journey. UNESCO’s Head of Foresight and editor of the book, Dr. Riel Miller, will visit Berlin to explore the skills needed for successful transformation with a selected group of at most 40 futurists, organizational developers, entrepreneurs, social innovators, policy makers, researchers, civil society representatives and others. The workshop will take place on

Monday June 18th, 2018
from 19:00 to 21:00 (doors open 18:30)
at the cocreation.loft,
Schinkestraße 9, 12047 Berlin.

The workshop has two goals: First, make visible the range of methods and skills that are available and needed to transform the future. Second, connect different communities that work on improving our future. It will be highly interactive with many opportunities to share your perspectives with other participants. Appearing in more formal roles will be:

Keynote speaker: Riel Miller, UNESCO, Head of Foresight.

Discussant: Christine Wank, Generative Facilitation Institute.

Discussant: Martin Ciesielski, Medienmosaik, CJO Chief Jest Officer.

Facilitator: Stefan Bergheim, Zentrum für gesellschaftl. Fortschritt.

Graphic Harvester: Katrin Faensen, Visual Facilitators GmbH.

The event is by invitation only. Please reserve a place either via the Eventbrite link sent to you, by responding to the person who invited you, or by sending a message to stefan.bergheim@fortschrittszentrum.de. Drinks and snacks will be available. The event will be filmed, so let us know at the entrance, if you do not want to be shown on film or photograph.
